

## **Ethanol-Free Premium Fuel now at the LQ Gas Station**

With boating season starting, the City of Lake Quivira is excited to provide an ethanol-free fuel option at our gas station.

This change is for the premium-grade fuel (91 octane) only. There is no change to the regular and mid-grade fuel.

While 10% ethanol is approved for most vehicles, ethanol-free fuel is recommended by many manufacturers and mechanics for small engines and boats.

The gas station is owned by the City of Lake Quivira. Last year the city took over the day-to-day operations of the station. All profits from the station help pay for the upkeep of the station and other city projects.

This summer we will use these proceeds to repair and upgrade the fuel island.
